

To all our patients and future patients, we understand that the COVID-19 pandemic crisis is overwhelming for everyone. We have had a miscommunication about our requirements for testing and exposure. At Fertility Partnership we are doing everything to keep our patients and employees safe. We do have testing here at the clinic, both the swab and the rapid tests for our patients. If you have been exposed please quarantine for the recommendation by the CDC for 14 days. After the 14 days and you have been cleared by your primary care or other doctor, we can see you in the office. Our goal is the safety of our patients and employees especially due to the rise in cases in St. Charles County. Masks are a requirement and please no children in the office. Again, we are protecting everyone involved. Please stay safe! 😊
